DETAILED ACTION

1. Claims 1-19 are pending in the instant application.

Election/Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, 17 and 18, drawn to a polynucleotide and uses thereof, classified in class 424, subclass 93.1.

- II. Claims 12 and 13, drawn to a method of gene therapy, classified in class 514, subclass 44.

- III. Claims 14-16, and 19, drawn to a polypeptide, classified in class 530, subclass 350.

3. The inventions are distinct, each from the other because of the following reasons:

The inventions of the groups I and III are patentably distinct from each other because they are drawn to different compositions that have different physical and chemical properties and have different utilities. For example, the structure of a nucleic acid is different from that of a protein. Additionally, the utilities of a nucleic acid molecule include making probes and vectors whereas the utilities of a protein molecule include production of antibodies. The invention of group II is drawn to a method of gene therapy and is patentably distinct from each of the groups I and III because the method of groups II can not be used for producing the compositions of groups I and III. Although, the composition of group I can be used for practicing the method of group II, the composition of group I can be used for other purposes.

Art Unit: 1632

Therefore, the inventions of the groups I-III are patentably distinct each from the other and their analysis will require separate searches in the non-patent literature.

4. Because these inventions are distinct for the reasons given above, have acquired a separate status in the art shown by their different classification and their recognized divergent subject matter, and because each invention requires a separate, non-coextensive search, restriction for examination purposes as indicated is proper.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ram R. Shukla whose telephone number is (703) 305-1677.
